## CODE

I have the following programming language skills

- **Proficiency:** Mathematica, Python, HTML
- **Familiarity:** Cython, CSS

In addition, I co-authored the code package [dmdd](#), ascl:1506.002

- [dmdd](#) is a python package that enables simple simulation and Bayesian posterior analysis of nuclear-recoil data from dark matter direct detection experiments for a wide variety of theories of dark matter-nucleon interactions. [dmdd](#) was developed in collaboration with Vera Gluscevic for use in [arXiv:1506.04454](#), additionally with Moira Gresham, Annika H. G. Peter, and Kathryn M. Zurek.
- [dmdd](#) was used by the PICO collaboration to set official limits in [arXiv:1510.07754 \[hep-ex\]](#)
